The 4th International Conference on Energy Science and Applied Technology (ESAT 2018: http://www.ESATconf.org/, Chongqing, China, 29-30 December 2018) aims to provide an interactive platform for the academics, R & D organizations, industries, innovators, entrepreneurs, government agencies and policy-makers from both China and abroad to exchange ideas on recent researches and advances in the domain of energy science and applied technology with its prospective application in the various interdisciplinary domains of engineering.

This two-day conference was organized in technical association with the Asian Union of Information Technology and included invited keynote talks and oral paper presentations from both academia and industry. The themes covered in this proceedings are: Technologies in Geology, Mining, Oil and Gas Exploration and Exploitation of Deposits; Renewable Energy and Cell Technologies, Energy Recovery, Engines, Generators, Electric Vehicles.

The book is useful to professionals and scientists involved or interested in Energy Science and Applied Technology. Hopefully, all participants and other interested readers will benefit scientifically from the proceedings and also find it stimulating in the process.

With our warmest regards

Zhigang Fang

Conference Organizing Chair
